My Portfolio

MENNAALLAH ABDALOMOATY
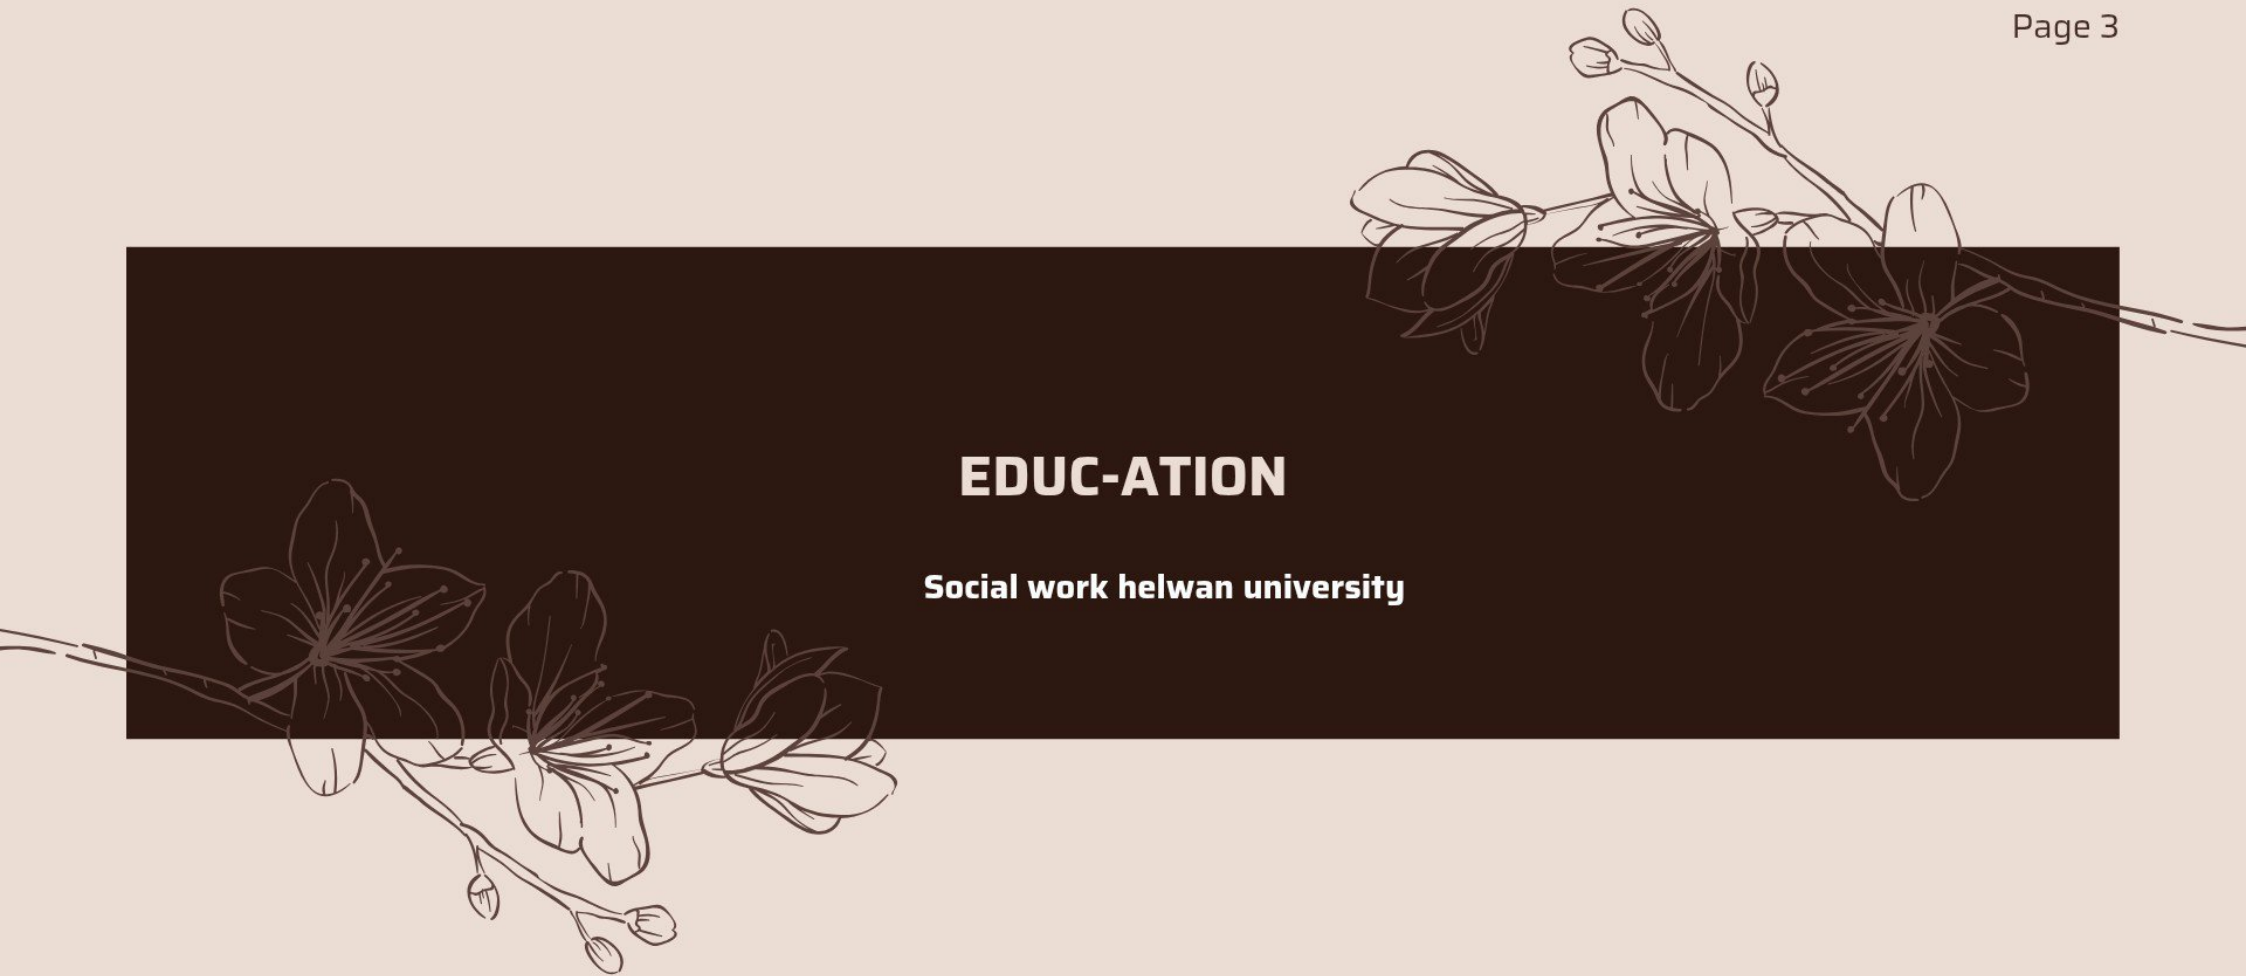

Software tester

About Me

I am a third-year university student and a passionate software tester with strong communication and problem-solving skills. With a solid foundation in Java and object-oriented programming, I specialize in ensuring software quality by identifying and resolving defects. My analytical mindset and attention to detail allow me to apply various testing meythodologies to deliver reliable and high-performance software solutions. I am eager to continue learning and growing in the field of software
